

**PETITION FOR SHAWNEE NATIONAL FOREST PLAN REVISION**

We, the undersigned, petition the U.S. Forest Service to provide a revised forest plan for the Shawnee National Forest (SNF) that bans Off-Road vehicle use, eliminates all commercial logging, provides a well-maintained and marked trail system for horse riders and hikers, and. eliminates cross-country horse riding. The plan should also make protection of state (IL) and federal threatened and endangered species the highest priority. We also oppose any new oil, gas or mineral leases on the forest. All of the 80 Natural Areas should be protected from incompatible uses (horse riding, motorized vehicles, camping, etc.). The six high quality streams should be recommended as Wild and Scenic Rivers. We oppose artificial wildlife openings that further fragment the forest. We support wilderness level protection of Burke Branch, Ripple Hollow and Camp Hutchins. We support requiring the Univ. of Illinois to provide land important to SNF in exchange for the Dixon Springs Agricultural Research Station within five years.
