

# A Sierra Club Presentation

## Amazing Cave Creatures

A presentation by Steve Taylor, research biologist for the Illinois Natural History Survey, will present a program on cave invertebrates (snails, flatworms, spiders, springtails, cave crickets, millipedes, flies, aquatic isopods, amphipods, and beetles) in 1) Lava Beds National Monument, 2) Illinois' Sinkhole Plain, and in 3) Central Texas.

Taylor will shed light on endangered species that few people ever get to see.
